

# CARBON FOOTPRINT CERTIFICATE

January – December – 2023

## Cascina Palazzo

Strong relationships rely on cooperation, shared goals and beliefs. By choosing for reusable trays from Euro Pool System you contribute to the further transitioning to a more circular economy and to the building of a more collaborative and sustainable supply chain.

Euro Pool System's goal is to mitigate its impact on the environment by monitoring and reducing the greenhouse gases emissions resulting from our company activities.

Information on our carbon footprint and the reduction we have realized together with Cascina Palazzo

**80.450**  
Rotations of  
reusable trays

**15,680**  
Tons of CO<sub>2</sub>- equivalent  
emitted  
for the total amount  
of rotations

Croatia Euro Pool System

*8th of October 2024*

\*These savings have been calculated with the Life Cycle Assessment (LCA) Calculator (2020) which is based on independent studies carried out by the University of Stuttgart (2017) and Fraunhofer Institute (2018) and commissioned by the Stiftung Initiative Mehrweg (SIM = Foundation for Reusable Systems). This study shows that reusable trays create considerably lower greenhouse gas emissions than cardboard, when providing the same transport service. More information can be found at [www.stiftung-mehrweg.de](http://www.stiftung-mehrweg.de)
